DETAILED ACTION

Claims 1-11 have been canceled. Claims 12-23 have been added and are under consideration.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12, 13, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Shuel (J. Apicultural Res., 1986, Vol. 25, No. 1, pg 35-43).

Shuel taught a royal jelly peptide that differentiated honeybees into two queen bees when included in larval diet. Without evidence to the contrary, the peptide described by Shuel improves "the auxiliary effect of inducing differentiation of honeybees to queen bees" because two queen bees were obtained.

Claims 14, 15, 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Nomura (JP 08059499).

Nomura taught a royal jelly peptide that improved immunity when given with food. Nomura discloses using the compound in persons, which is equivalent to a human as in claims 21 and 23.

Conclusion

Art Unit: 1632

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Kamakura (JP 2001240549) disclosed royal jelly immunostimulants.

Okamoto (Life Sciences, Sept. 5, 2003, Vol. 73, No. 16, pg 2029-2045) taught royal jelly proteins that module immune responses in vivo.
